

Python: module vcs.projectiongui

vcs.projectiongui

[index](#)

The projection GUI editor

Modules

Tkinter	browser.gui_control	string
browser	gui_support	tkFileDialog
copy	os	vcs

Classes

ProjGUI

class *ProjGUI*

Methods defined here:

```
__init__(self, canvas=None, gui_parent=None, dialog_parent=None, master=None, name='default', Parent=None)
```

```
cancel(self)
```

```
evt_open_file(self)  
    # Open VCS file
```

```
evt_save_as(self)  
    # Save VCS projection as a new name
```

```
evt_save_to_file(self)  
    # Save VCS Color map to a file
```

```
exit(self)
```

```
loadproj(self, result)
```

```
rename_proj(self, result)  
    # Save, copy, and write colormap to a file
```

```
reset(self)
```

```
save_vals(self)
```

```
setgui(self, *crap)
```

```
setprojection(self, *crap)
```

```
settype(self, *crap)
```

Functions

```
create(gui_parent=None, projection='default', canvas=None)  
    # Create/Popup projection GUI for VCS.
```

Data

```
Pmw = <Pmw.Pmw_1_2.lib.PmwLoader.PmwLoader instance>
```
